Bulk Image Uploader

This module will allow you to mass upload images from either Dropbox or ftp/FileTransferProtocol.

1. Download the extension package.
2. Have a valid Dropbox account and the program installed on your local computer, or FTP account with login/password.
3. Install the module according to the instructions from readme file (included in the package).
4. Login to Magento Admin.
5. Go to System/Configuration. Choose Image Import from the left menu under TROLLWEB.

Extension settings

General Settings

The general settings of the extension are located at **System -> Configuration -> TrollWeb -> Image Sync** backend page.

> **Important info**
> For the image to be connected to a product, the image filename must be the same as the SKU of the target product.

ImageSync Options

Import method	Dropbox ▼	[STORE VIEW]
	▲ Image import method.	
Dropbox image directory	/testfolder/	[STORE VIEW]
	▲ Dropbox directory to import images from. Example: images/to_be_imported	
Use as main image	Yes ▼	[STORE VIEW]
	▲ Sets uploaded image as the main product image. Images named SKU.jpg (or .gif or .png) wille be used as main image, SKU_1.jpg, SKU_42.jpg, etc will be used as additional images.	
Remove old images	No ▼	[STORE VIEW]
	▲ Removes all old images from the product (if existing), before adding new ones. Use with caution!	
Delete files after upload	No ▼	[STORE VIEW]
	▲ Delete image files after successful upload	
Rename files after upload	Yes ▼	[STORE VIEW]
	▲ Adds "UPLOADED" as prefix after successful upload. These files will not be shown as available for import afterwards.	
Enable logging	No ▼	[STORE VIEW]
	▲ Activate logging to var/log/trollweb_imagesync.log	
Dropbox Authorization	**Dropbox Authorization**	[STORE VIEW]
	▲ Click to go to the dropbox authorization page to change dropbox account or to re-authorize dropbox.	

- **Import method**: Choose either Dropbox or Local Directory
- **Dropbox image directory / Local image directory**: This is the image directory in your dropbox or the path on your ftp server, where the extension will pull the image files from.

  - For Dropbox: when specifying the path to the folder, use only the text after *www.dropbox.com/home/*
  - For Local Folder upload: specify the file path relative to the root folder of your Magento installation

- **Use as main image**: Define whether the uploaded image will be used as the main product image.
- **Remove old images**: Define whether the extension will delete the existent images (if there're any) of a product before importing the new ones. Note: this action is unrecoverable.
- **Delete files after upload**: Deletes files from the local dropbox or ftp server after upload is finished
- **Rename files after upload**: Adds "UPLOADED as filename prefix (These images will not be listed)
- **Enable logging:** Enable/ disable logging of the extension activity
- **Dropbox Authorization**: Click this button and follow the instructions below to connect to your Dropbox account.

Dropbox Authorization

1. Make sure you are logged in to your Dropbox account

2. Click **Dropbox Authorization** button in the extension settings, and then follow the link from the page that opens:

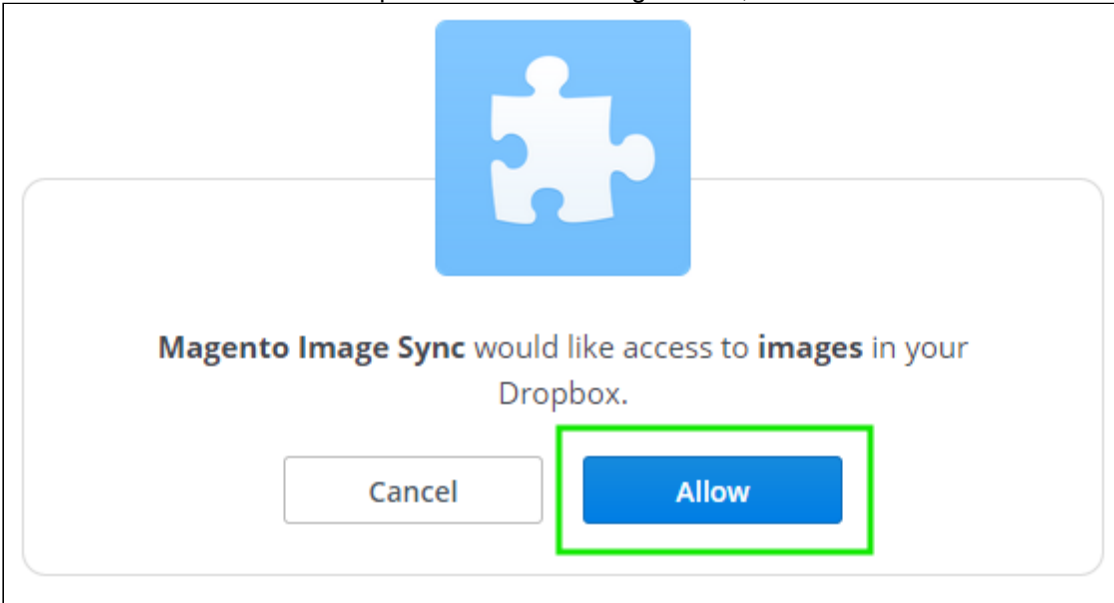

3. You will be redirected to the Dropbox site. In the dialog window, click "**Allow**"

4. Copy the authorization code from the next screen
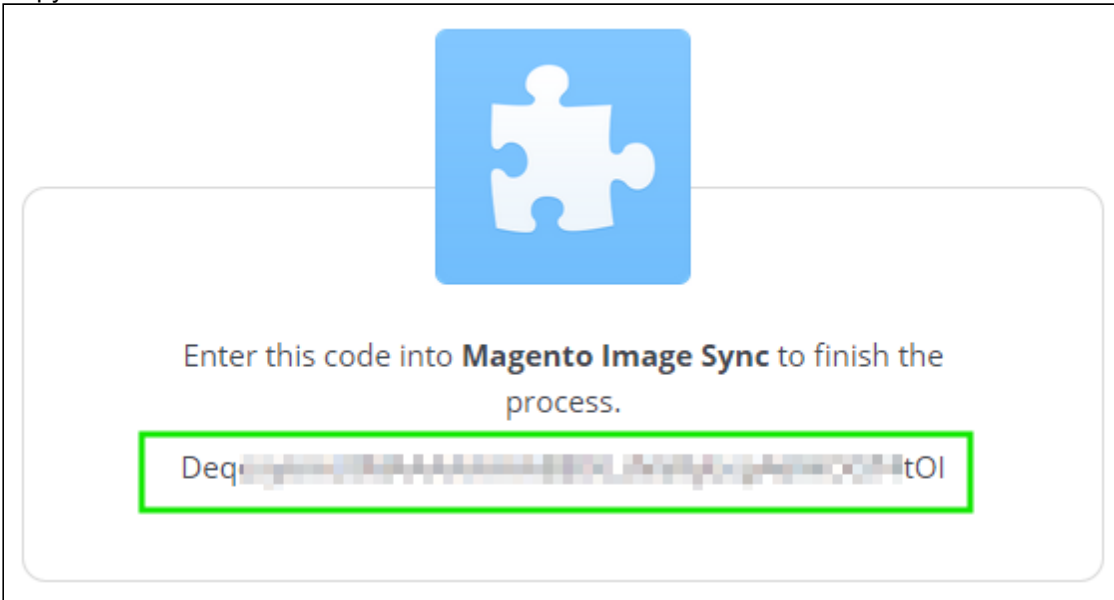

5. Switch back to the Magento backend, paste the code into the correspondent field and click **Save** button.

Starting the import

A new import session is initiated each time you access **Catalog -> Trollweb ImageSync** backend page.

Local images

Select All | Unselect All | Select Visible | Unselect Visible | **0 items selected**　　　　　Actions [▼] **Submit**

	SKU	Path	File name	File size	Status
☐			dino-red.png	9 kB	dino-red
☐			dino-green.png	9 kB	dino-green
☐			dino-blue.png	9 kB	dino-blue

Info
500-1000 pictures is maximum when uploading pictures. If you have several thousands of pictures, please split the image folder and upload a maximum of 1000 pictures at once.
