Product Preview Pro

Created by Unknown User (krupenin), last modified by Anton Lashuk on янв 06, 2019

Installation
- Set Up list.phtml
  - List Mode
  - Grid Mode
- Magento 1.3x +
- Magento 1.4x +, Enterprise and Professional
Configuration
Uninstallation
Troubleshooting

Extension page: http://ecommerce.aheadworks.com/magento-extensions/product-preview-pro.html

The extension gives you and your store visitors an ability to preview the enlarged product image exactly on the category page. Just hover the mouse cursor over the item picture and examine every product detail in the popup appeared.
With the Product Preview Pro extension, you can set up any popup image size you want to fit your store requirements. The "Show in categories" field allows you to specify only those categories the product preview should be displayed at.
Installation

1. Backup your web directory and store database.
   Click to view details
   You can make backup copies with any tool you find appropriate

   If you are going to use the native Magento backup function, navigate to **System -> Tools -> Backups** and perform **System** and **Database** backups

2. Log in to the Magento backend

3. Disable compilation
   Click to view details
   Navigate to **System -> Tools -> Compilation**.

   If Compiler status is Disabled, you can skip to the next step

   If Compiler is enabled, disable it.

Compilation   [✔ Disable] [✔ Run Compilation Process]

Compilation State

Compiler Status	Enabled
Compilation State	Compiled
Collected Files Count	7505
Compiled Scopes Count	4

IMPORTANT: after the extension is installed, you can enable the compilation again; **IT IS CRUCIAL** that you use "**Run Compilation Process**" function, not just "Enable button"

Compilation   [✔ Enable] [✔ Run Compilation Process]

Compilation State

Compiler Status	Disabled
Compilation State	Compiled
Collected Files Count	7505
Compiled Scopes Count	4

> Installing an extension with the Compilation enabled will result in store downtime.

---

4. Flush store cache
   Click to view details
   You can flush the store cache in 2 ways:

   - **via the backend**:

   Navigate to **System -> Cache Management** menu, and click **Flush Magento Cache** button

   Cache Storage Management   [✗ Flush Magento Cache] [✗ Flush Cache Storage]

   Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected   Actions [Refresh ▾] [Submit]

	Cache Type	Description	Associated Tags	Status
☐	Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
☐	Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
☐	Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED

   - **via filesystem**:

   On your server, navigate to Magento root folder, then proceed to **/var/cache/;** delete all the content there.

---

5. Download the extension package from your account and extract the downloaded archive

---

6. Copy the content of **/Step_1/** folder to your store's root directory

---

7. Copy the content of **/Step_2/** folder to your store's root directory

---

8. Flush store cache again; log out from the backend and log in again.

Set Up list.phtml

- To display the preview images on the *View Category* page:

open the **/app/design/frontend/*<your_package>*/*<your_theme>*/template/catalog/product/list.phtml** file

List Mode

Find the following line:

```php
<?php // Product Image ?>
```

and insert following line right after it:

```php
<div id="ppp-id-<?php echo $_product->getId();?>"></div>
```

Grid Mode

Find the following line:

Magento 1.3x +

```php
<p class="product-image">
```

Magento 1.4x +, Enterprise and Professional

```php
<li class="item<?php if(($i-1)%$_columnCount==0): ?> first<?php elseif($i%$_columnCount==
```

and insert following line right after it:

```php
<div id="ppp-id-<?php echo $_product->getId();?>"></div>
```

Configuration

To configure the extension, go to the **System > Configuration > aheadWorks Extensions > Product Preview Pro** backend page.

Note: *the preview image will be scaled to the resolution specified in the "Max image size" field. If no value specified, 300px is set up by default*

Uninstallation

1. Disable compilation, in case it is enabled.
2. Login to your FTP, navigate to **app/etc/modules/**
3. Open the file AW_Ppp.xml and change the following line:

```
<active>true</active>
```

to

```
<active>false</active>
```

Now your Magento is unaware of the existence of extension.

4. Clear the cache under var/cache
5. Make sure that the site is working properly, otherwise roll back the changes and apply to our technical support.
6. If everything works fine, it is safe to delete the files of the extension.

Troubleshooting

After the extension installation the store gives an error, or blank page, or suggests to start Magento installation procedure.

Change the owner of the extracted extension files to the web server user and set 775 permissions on them. Clear the store cache and try again.

There is no aheadWorks extensions under my configuration section, or having the extension tab clicked I get a blank page, or Access Denied error.

Clear the store cache, browser cookies, logout and login again.

I've set up everything correctly, inserted the HTML code but there is nothing on that page.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.

My configuration changes do not appear on the store.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.
