- 6 Troubleshooting

Extension page: <http://ecommerce.aheadworks.com/free-stuff/video-module-community-edition.html>

This simple extensions allows you to embed video on product pages.

Installation

C

1. Backup your web directory and store database.

[Click to view details](#)

You can make backup copies with any tool you find appropriate

If you are going to use the native Magento backup function, navigate to **System -> Tools -> Backups** and perform **System** and **Database** backups

Backups System Backup Database and Media Backup Database Backup

Page 1 of 1 pages | View 20 per page | Total 0 records found Reset Filter Search

[Select All](#) | [Unselect All](#) | [Select Visible](#) | [Unselect Visible](#) | 0 items selected Actions Submit

Time	Name	Size, Bytes	Type	Download	Action
------	------	-------------	------	----------	--------

2. Log in to the Magento backend

3. Disable compilation

[Click to view details](#)

Navigate to **System -> Tools -> Compilation**.

If Compiler status is Disabled, you can skip to the next step

If Compiler is enabled, disable it.

Compilation Disable Run Compilation Process

Compilation State

Compiler Status	Enabled
Compilation State	Compiled
Collected Files Count	7505
Compiled Scopes Count	4

IMPORTANT: after the extension is installed, you can enable the compilation again; **IT IS CRUCIAL** that you use **"Run Compilation Process"** function, not just "Enable button"

Compilation Enable Run Compilation Process

Compilation State

Compiler Status	Disabled
Compilation State	Compiled
Collected Files Count	7505
Compiled Scopes Count	4

Installing an extension with the Compilation enabled will result in store downtime.

4. Flush store cache

Click to view details

You can flush the store cache in 2 ways:

- **via the backend:**

Navigate to **System -> Cache Management** menu, and click **Flush Magento Cache** button

Cache Storage Management Flush Magento Cache Flush Cache Storage

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected Actions Refresh Submit

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED

- **via filesystem:**

On your server, navigate to Magento root folder, then proceed to **/var/cache/**; delete all the content there.

5. Download the extension package from your account and extract the downloaded archive

6. Copy the content of **/Step_1/** folder to your store's root directory

7. Copy the content of **/Step_2/** folder to your store's root directory

8. Flush store cache again; log out from the backend and log in again.

Configuration

To add a video to a product:

1. Navigate to **Admin > Manage products > Edit a product > Video**
2. Paste embed-code of your video (the HTML code) in the Video box and save the product.

The video would be visible in additional information of the product page.

Uninstall

Since Magento does not give ability to handle automatic uninstall for its modules, you need to run the following query on your database manually:

```
DELETE FROM eav_attribute WHERE attribute_code = 'aw_video';
```

This will delete the extension attributes from the database. After that, you can safely remove the extension files from your store.

Troubleshooting

After the extension installation the store gives an error, or blank page, or suggests to start Magento installation procedure.

Change the owner of the extracted extension files to the web server user and set 775 permissions on them. Clear the store cache and try again.

There is no aheadWorks extensions under my configuration section, or having the extension tab clicked I get a blank page, or Access Denied error.

Clear the store cache, browser cookies, logout and login again.

I've set up everything correctly, inserted the HTML code but there is nothing on that page.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.

My configuration changes do not appear on the store.

Clear the store cache, clear your browser cache and domain cookies and refresh the page.
